## NOTICE OF DEEMED CONSENT TO HIV TESTING

A law was enacted in Virginia in 1989, which authorizes health care providers to test their patients for HIV antibodies when the health care provider is exposed to the body fluids of a patient in a manner which may transmit human immunodeficiency virus (HIV- "AIDS virus"). In the event of such an exposure, patients will be deemed to have consented to such testing and to have consented to the release of the test results to the health care provider who may have been exposed. Patients will be offered the opportunity for face-to-face disclosure of the results of the HIV test and counseling.

I have read and understand the above "Notice of Consent for HIV Blood Testing."

## Consent for Hepatitis B or C Blood Testing

In addition to testing for HIV, I give my consent to test Hepatitis B or C and release of the results as described in the Notice of Deemed Consent above.
